## Schedule your life tomorrow, TODAY

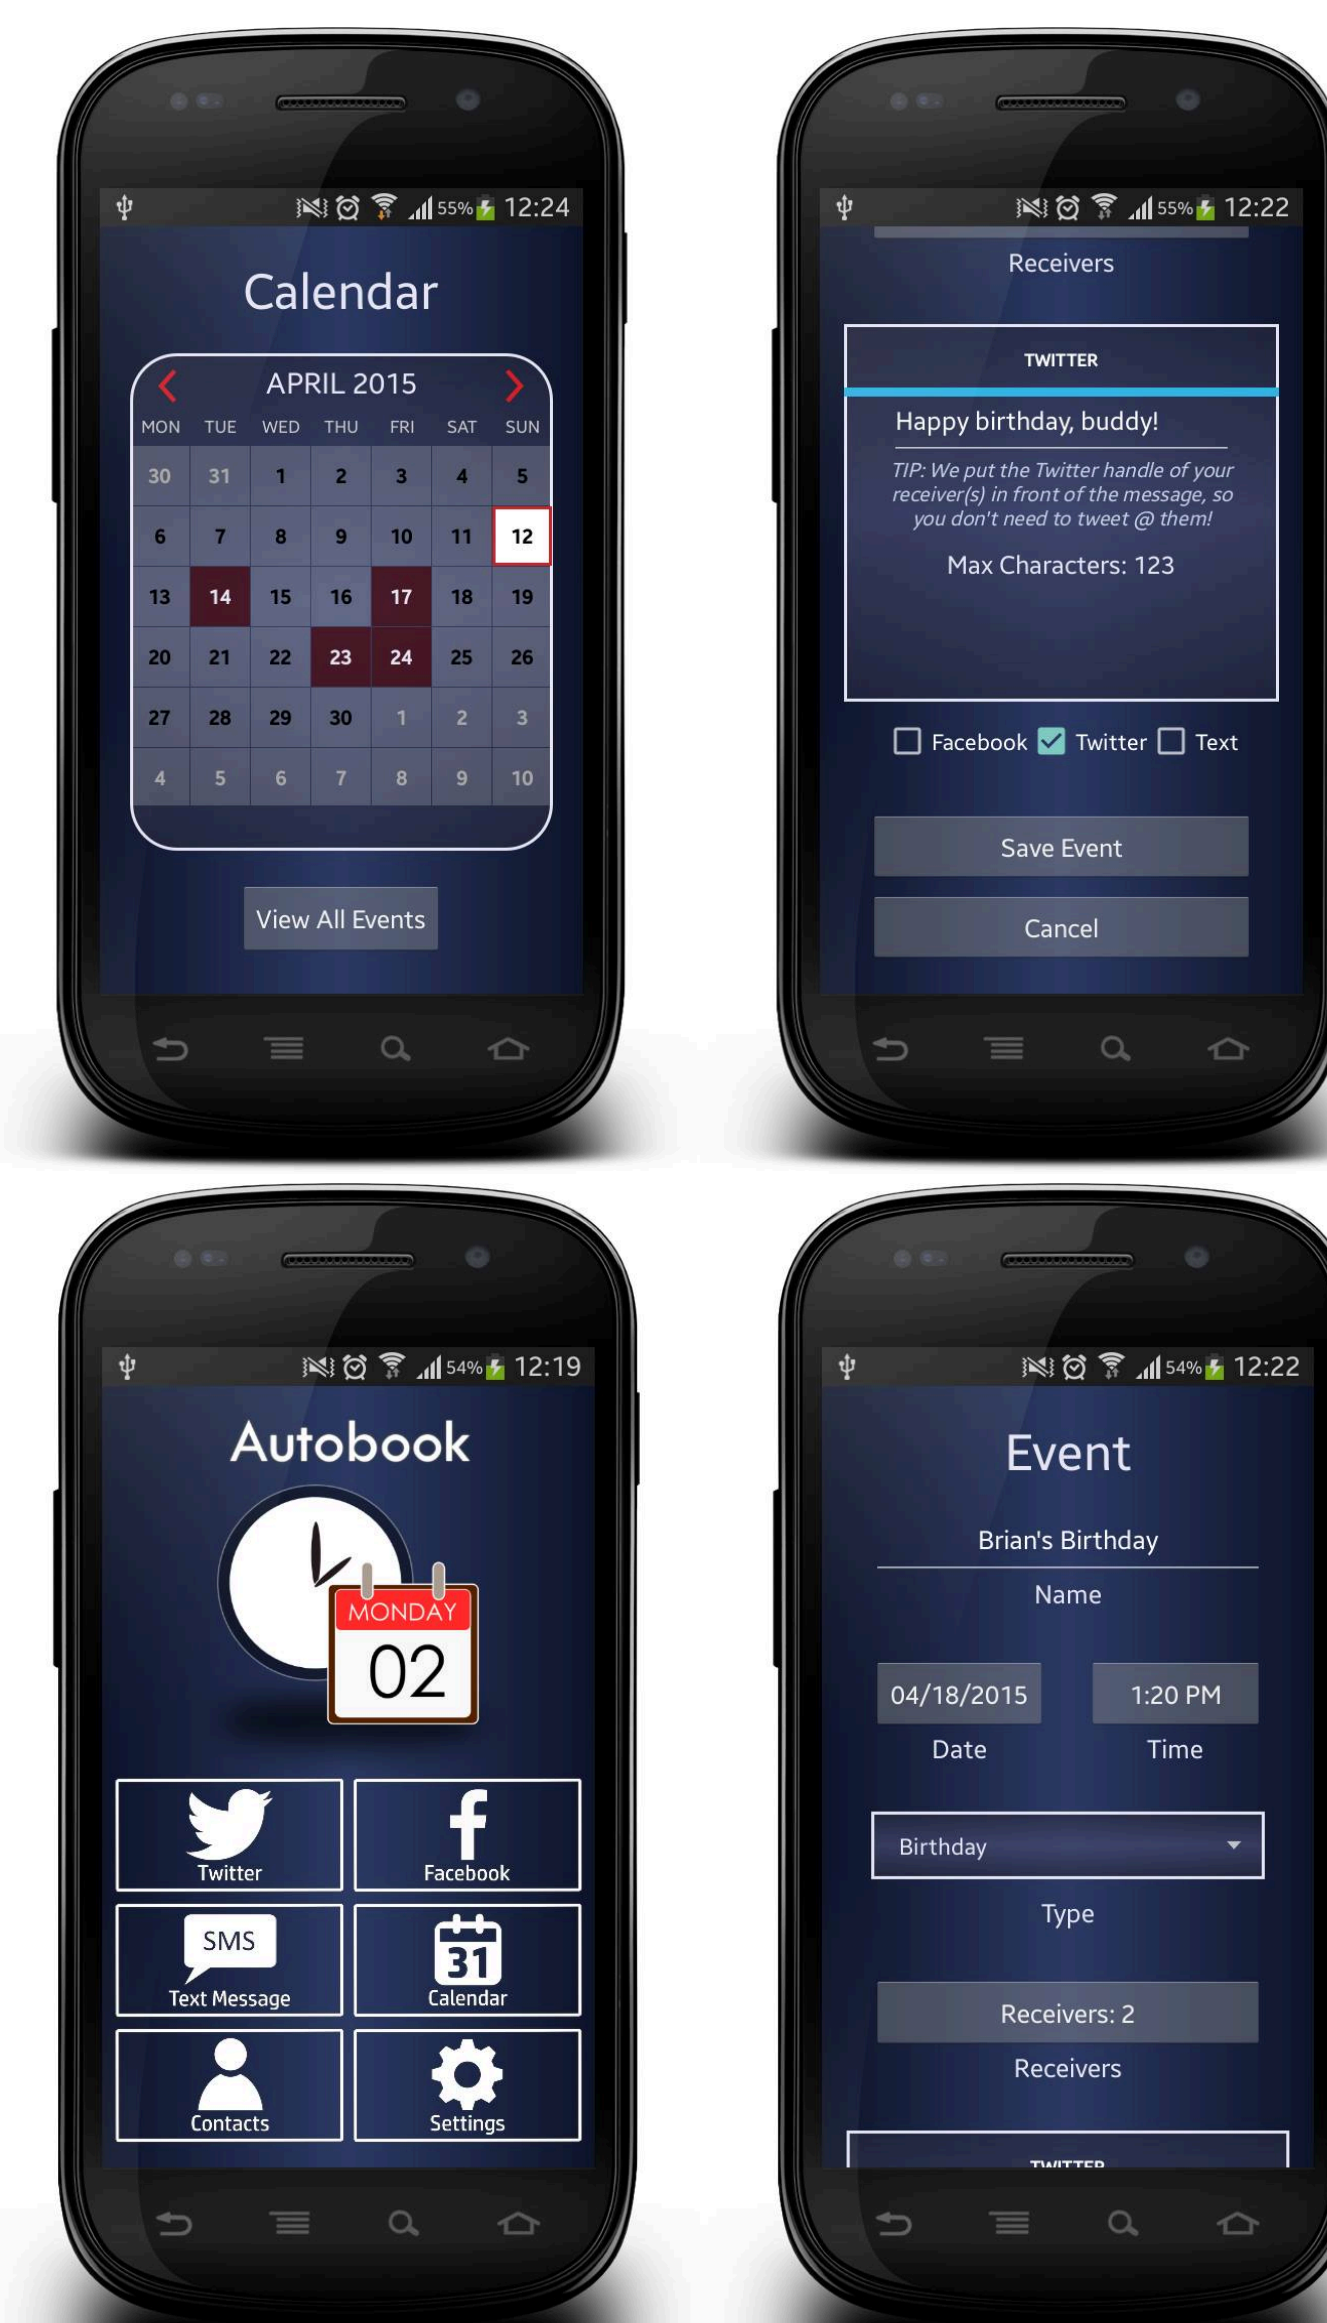

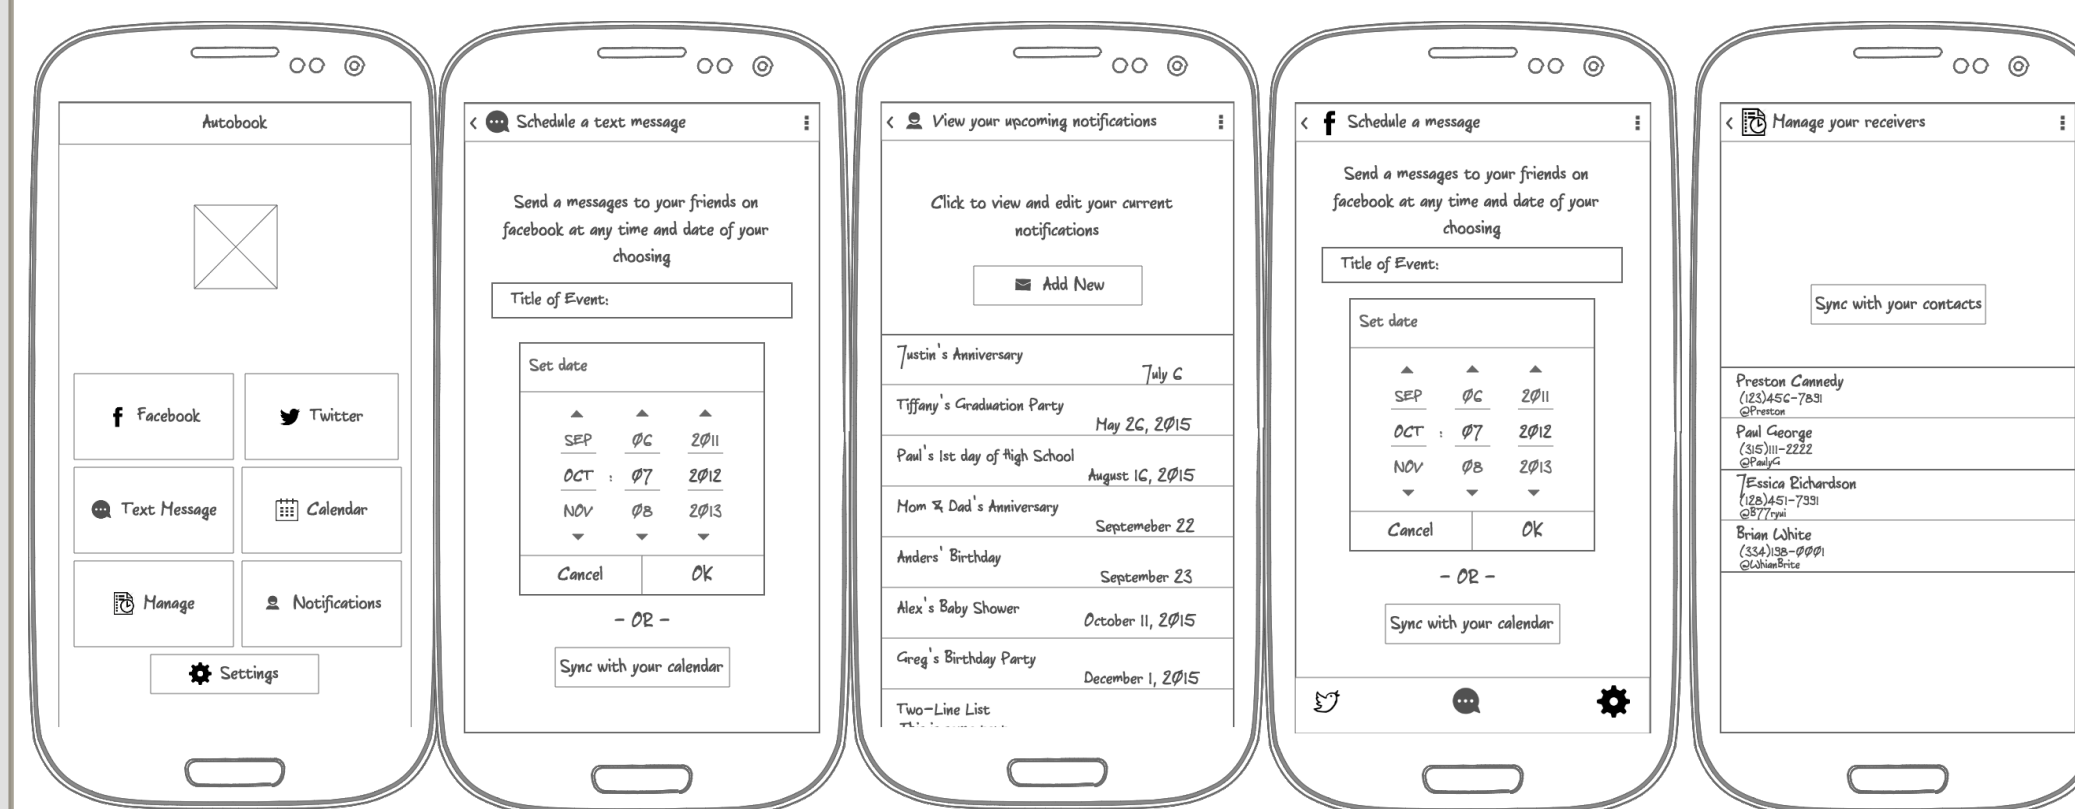

- Merge all smartphone interactions into one application
- Schedule automatic communication through social media and text messaging
- Designed for Android smartphones and tablets
- Seamless, Simple, Brilliant

## Use Case Diagram

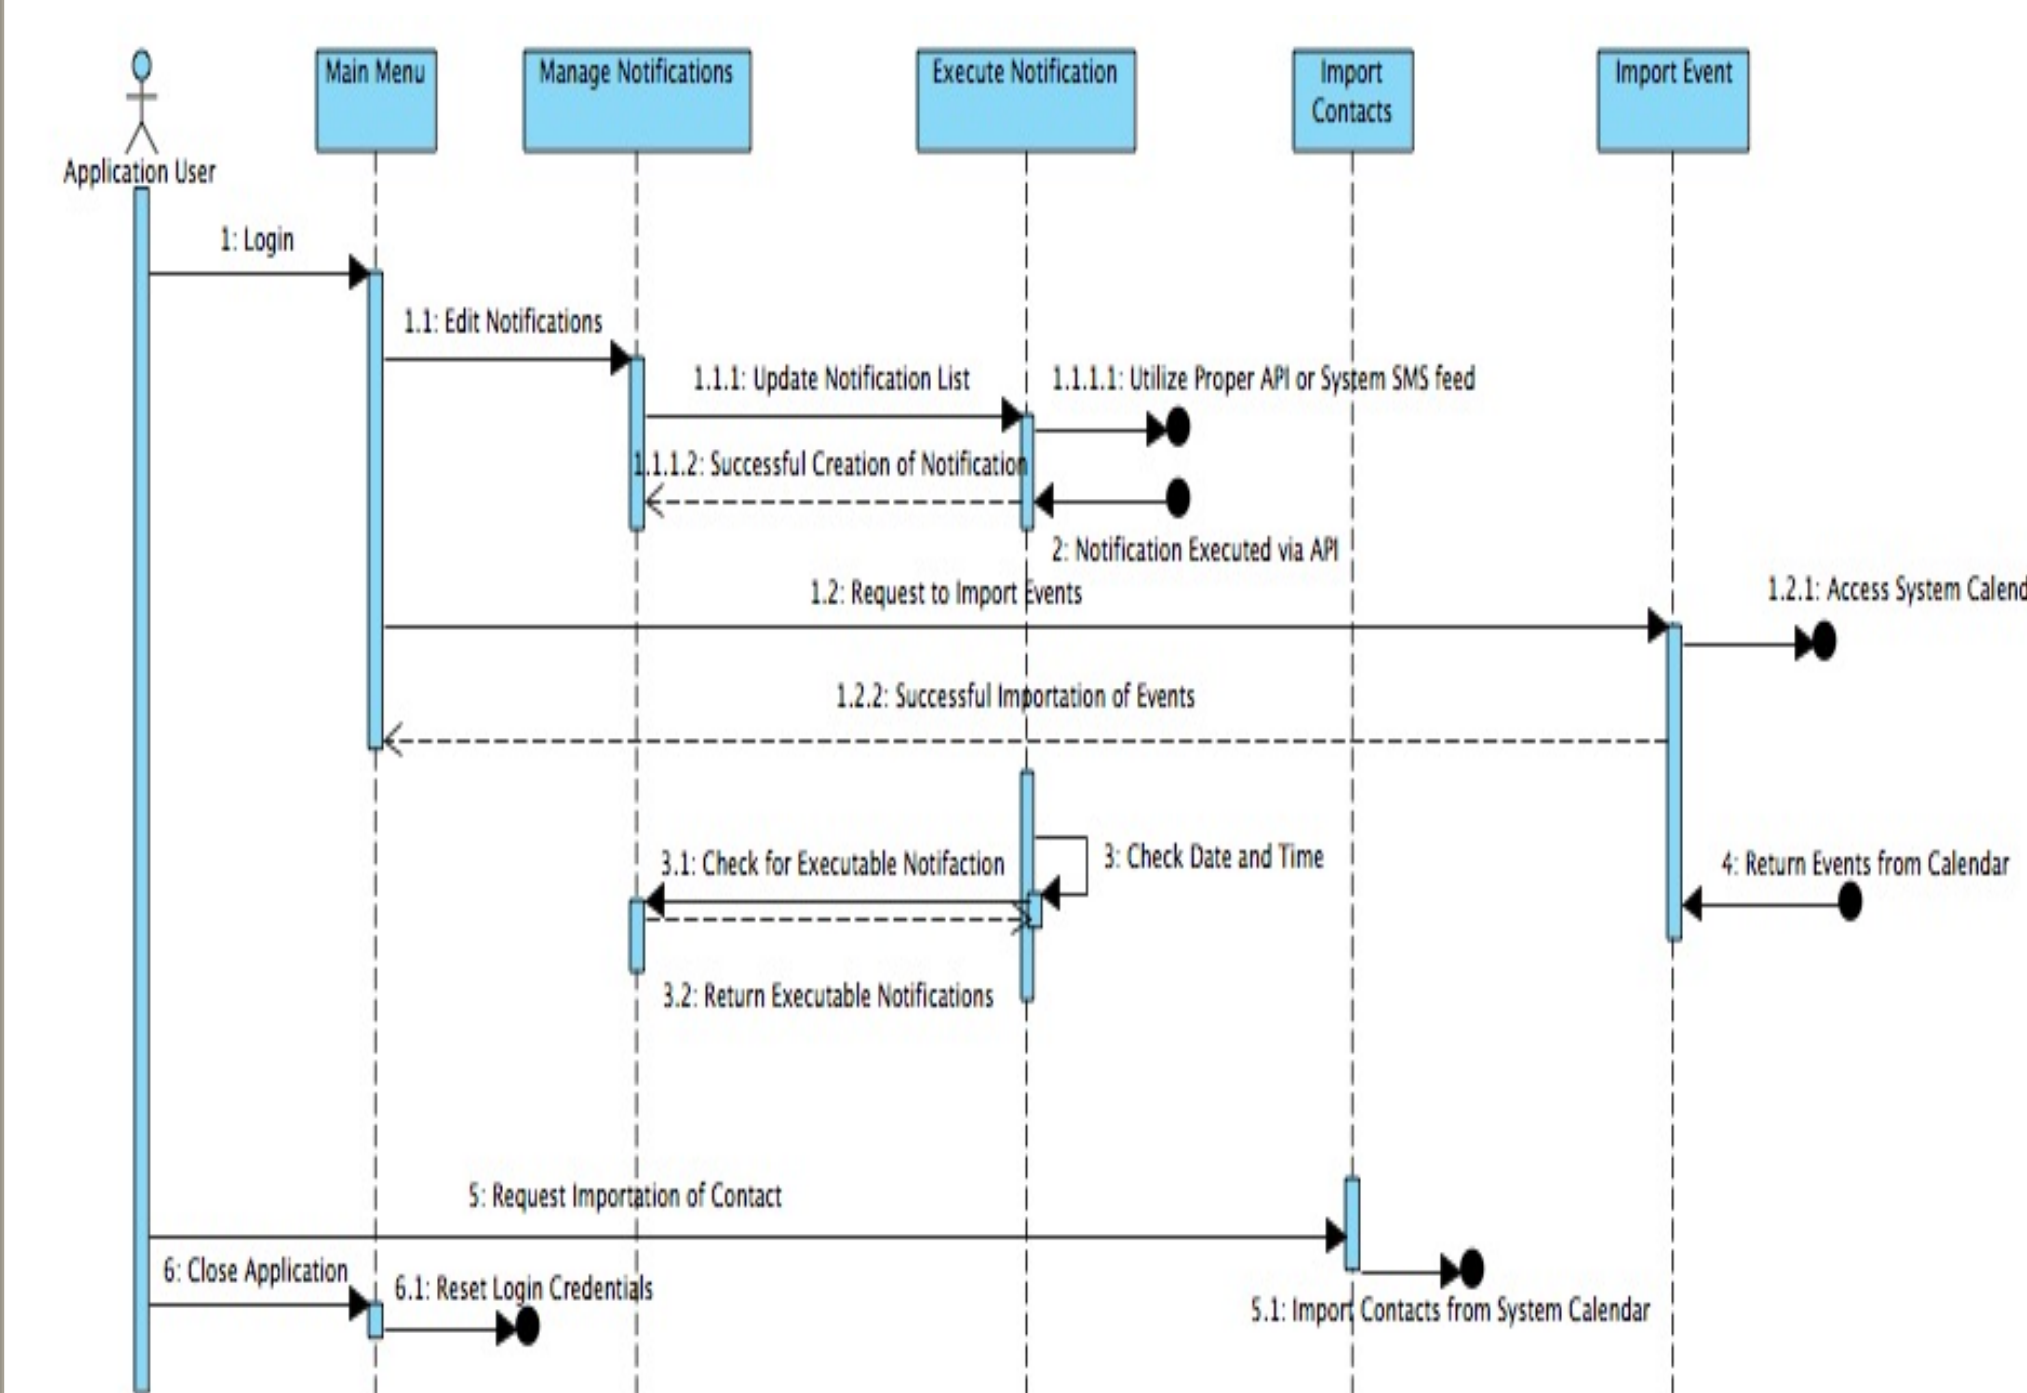

## About Autobook

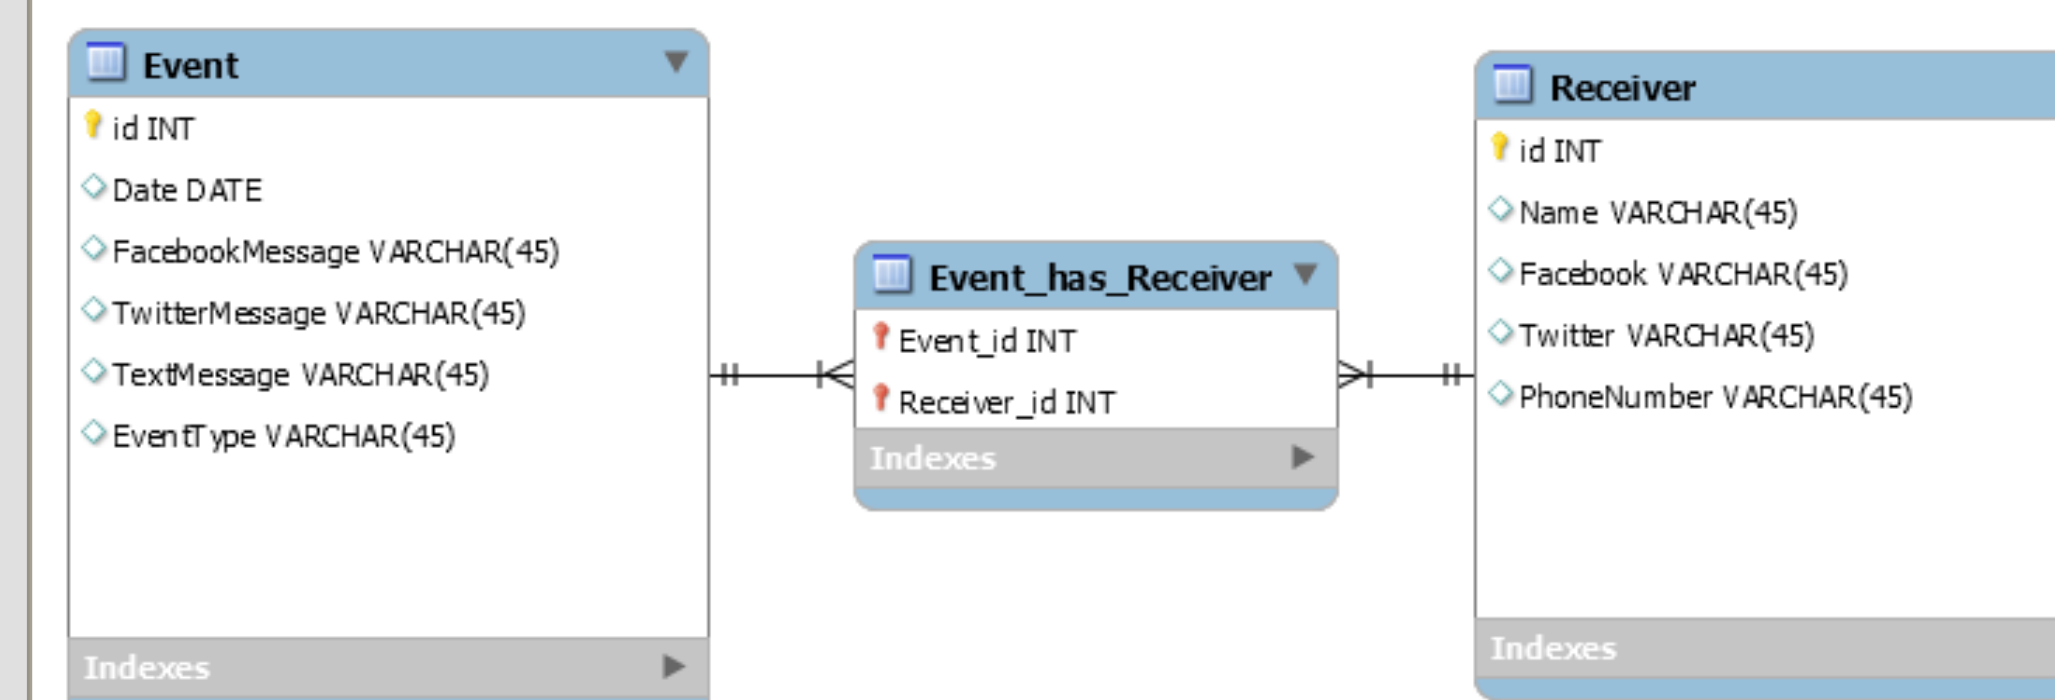

The Autobook application is designed to make it easier for users to remember to send text messages and post to their social media outlets at any specific date and time, seamlessly. This application will send personalized messages to designated recipients for any and all significant events in the future, automatically.
